Windows 98

Windows[®] NT DOS Windows[®] ME
Windows[®] 2000 Windows[®] 98

Benifits

- Minimize Your Support and Maintenance Costs
- Standardize All Computer Configurations
- Refresh the Computer on Every Boot
- Not Require Locking Down Any Application
- Eliminate Computer Downtime

Features

- True Hardware Solution
- Windows 95/98/ME/NT/2000 Support
- Recovers Instantaneously
- Plug and Play (No Format and Partition of Hard Drive Necessary)
- Minimal Hard Drive Usage
- System Agent 32 bit Access
- CMOS Auto-analysis / Backup / Restore
- Supervisor / Protection Mode
- Supervisor / User password Support
- S.M.A.R.T. System Compliant
- Patent Pending

Designed for

Microsoft[®]
Windows[®]98
Windows NT[®]

Distributed by CYIC Ltd.

Eliminate computer downtime

The only down equipment would be actual hardware failures such as hard drives, ...

Minimize your Support & Maintenance Costs

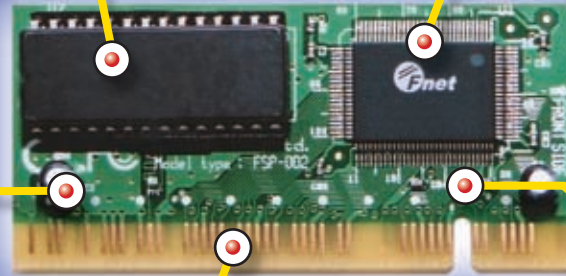

WatchDog eliminates the need for technical support and the very costly PC maintenance so you can spend more of your time doing real work.

Refresh the computer on every boot

WatchDog gives a fresh machine at every restart. All files accessed by normal users are deleted. The machine is returned to an as new state, with no history.

Not require locking down any application

WatchDog does not lock users out of any part of the operating system. In fact, WatchDog allows users to enjoy their computers totally, software and hardware.

Standardize all computer configurations

After setting all computers with a standard suite of software, do not worry about users changing any settings with WatchDog Protection.

WatchDog is a PCI interface card installed into a computer slot. By using interface card, it can take control before Windows®, the operating system. This prevents most virus infections. The primary function of WatchDog is to provide full-system backups for the purpose of fast system recovery. In fact, WatchDog recovers the computer INSTANTANEOUSLY.

Watchdog maintains and controls a small file allocated table in the hard drive. It records any modifications bit by bit. WatchDog Recovery Process is an algorithm programmed into an interface card, thus most programs or viruses cannot affect the protection of WatchDog.

WatchDog setup is very simple, just install the interface card into the PCI slot. Then turn on the computer, answer a few questions and the system is ready to go.

Technical Specifications	
• Operating Systems Supported	DOS/ Windows 95/98/ME/NT WS/2000WS
• BIOS Supported	Awards, AMI, Phoenix, ...
• Expansion Slot Required	PCI Interface Slot
• Hardware Requirement	486 PC Compatibles or above
• Data Partitions Allowed	Yes
• Y2K Compliance	Yes
• FCC Certifications	Yes (EMI,Class B)
• CE Certifications	Yes (EMI,Class B)
